Textiles and Leather

Textiles: Requirements are based on 54" wide plain material. Textiles varying from these dimensions may require a change in yardage requirements.

Leather: Quantity requirements are based on hides averaging 50–55 square feet. Per industry standard, one yard of textile is equal to 18 square feet of leather.

COM: In addition to our graded-in textile offering, you may specify your choice of fabric by manufacturer, pattern name, number and color, and we will handle the rest. Your specified textile will be added into a quote with the correct yardage. At the time of order, Plural will order the textile, track the textile shipment, receive, and inspect it. Any textile issues will be managed by Plural and communicated to you.
